Work Experience

Senior Front-End Developer

January 2026 - August 2026

Nartio

Turkey

Tasks and Achievements

- **Violo — AI-Powered Recruitment & Async Video Interview Platform**

1. Developed a scalable SPA using React 19, TypeScript, Vite, and Tailwind CSS.
2. Built video recording, processing, and compression workflows using FFmpeg WebAssembly.
3. Implemented Firebase authentication, role-based access control, and OpenAPI-based API integration.
4. Added multilingual support and optimized performance across desktop and mobile devices.
5. Collaborated with AI and backend teams to deliver interview and candidate assessment features.

- **AI Fluency Assessment Platform**

1. Developed an AI assessment platform using React 19, TypeScript, and Tailwind CSS.
2. Built candidate and recruiter dashboards for end-to-end assessment workflows.
3. Implemented real-time face detection and identity verification using MediaPipe.
4. Developed secure authentication and type-safe API integrations using OpenAPI.
5. Delivered multilingual, responsive, and high-performance user experiences.

Front-End Team Lead

December 2024 - November 2025

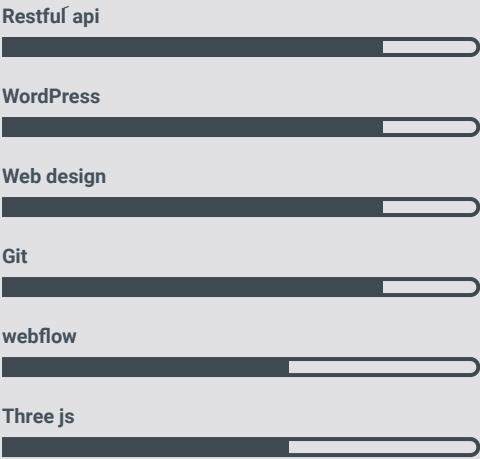

DEVOTEL

Turkey

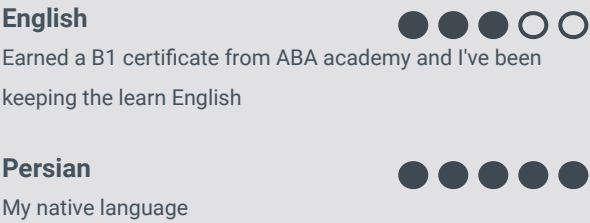

Tasks and Achievements

Led and mentored the frontend team across large-scale telecom and fintech products, including Esimora (eSIM), Lucibook, internal and customer-facing financial platforms, and the company's CPaaS solution.

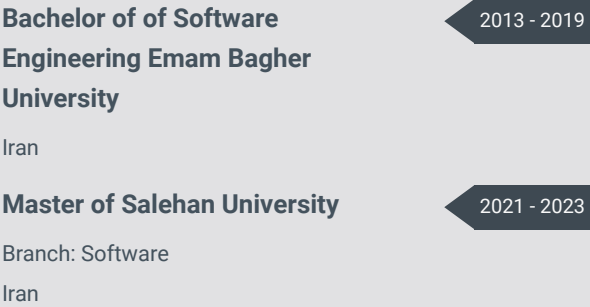

Responsible for frontend architecture, scalability, performance optimization, and on-time delivery of mission-critical systems, built using React.js, TypeScript, MUI, Tailwind CSS, React Query, Firebase, and Auth0.

Education

Senior Front-End Developer

June 2020 - June 2024

CFBTel

United States of America (USA)

Tasks and Achievements

- VoIP, CRM & Business Management Platform

- Developed scalable web applications using React.js and Vue.js for VoIP and business management solutions.
- Delivered CRM, CPaaS, Billing, Softphone, Ticketing, and Reporting systems used for daily business operations.
- Built custom calendar and advanced reporting features to improve workflow efficiency and data visibility.
- Integrated frontend applications with RESTful APIs and communication services.
- Improved performance, maintainability, and user experience through reusable component architecture.

Senior Front-End Developer

July 2020 - June 2021

SISHEMI

Tehran, Iran

Tasks and Achievements

- Web3 Wallet & Digital Asset Platform

- Developed secure Web3 applications and cryptocurrency wallet interfaces using React.js.
- Built HD wallet management and digital asset transaction workflows.
- Integrated Ethereum, TRON, and Bitcoin networks through Web3 libraries and blockchain APIs.
- Optimized performance, scalability, and user experience for blockchain-based financial products.
- Collaborated with blockchain and backend teams to deliver production-ready solutions.

Senior Front-End Developer

March 2019 - April 2020

Digialpha

Iran

Tasks and Achievements

- Trading & Social Investment Platform

- Developed advanced trading platforms using React.js, Vue.js, Nuxt.js, and Vuetify.
- Led the implementation of Copy Trading and Social Trading features, enabling users to follow and replicate trading strategies.
- Integrated real-time market data and trading services to deliver seamless trading experiences.
- Built scalable, reusable UI architectures and optimized performance across complex trading workflows.
- Collaborated with backend teams to integrate trading infrastructure and enhance platform capabilities.

mimtech

Iran

Tasks and Achievements

Developed and maintained web interfaces using HTML, CSS, JavaScript, and Angular. Assisted in building responsive and user-friendly e-commerce applications, focusing on usability and cross-browser compatibility. Collaborated with backend developers to integrate APIs and implement front-end features. Participated in bug fixing, UI enhancements, and ongoing improvements to application performance and user experience.

**Projects**

CRM & VoIP Management Platform (Cfbtel)

For: CFBTEL

- Developed a comprehensive CRM, ticketing, billing, and installation management platform using Nuxt.js, Vuex, Vuetify, and SCSS.
- Built custom calendar and workflow management features to streamline operational processes.
- Designed and maintained a scalable admin panel for managing VoIP services and customer operations.
- Improved user experience and operational efficiency through responsive and intuitive interfaces.
- Collaborated with backend teams to integrate business-critical services and workflows.

Link: <https://cs.cfbtel.com>**Rentifa — Global Car Rental Platform**

For: RENTIFA

- Developed and launched a global car rental platform using Nuxt.js, Vuetify, and Sass.
- Implemented multilingual support (English, Farsi, Arabic, German, and Turkish) using i18n.
- Built management and agent dashboards to streamline rental operations and partner management.
- Developed responsive and user-friendly interfaces optimized for international users.
- Collaborated with backend teams to integrate booking, management, and reporting workflows.

Ghahvedark — Multi-Vendor E-Commerce Platform

For: Ghahvedark

- Developed and maintained a production-grade multi-vendor e-commerce platform using Nuxt.js, Vue.js, Vuex, and Vuetify.
- Built vendor, product, order, and administration modules to support marketplace operations.
- Implemented scalable frontend architecture and reusable component systems for long-term maintainability.
- Optimized application performance and user experience across multiple devices and browsers.
- Integrated frontend applications with payment, inventory, and order management services.

Link: <https://ghahvedark.com/>

Babaheidar — Agricultural Service Platform

For: PAYDAR_KESHT

- Developed a web platform and administration system using Nuxt.js, Vuex, Vuetify, and SCSS.
- Built a dedicated PWA mobile panel that streamlined field management workflows for farmers and operators.
- Implemented polygon-based map selection tools, allowing precise field boundary management directly on interactive maps.
- Improved maintainability through reusable components and centralized state management architecture.
- Enhanced application responsiveness and user experience across multiple device types and screen sizes.

Ali Akbar Nouri — Personal Website & Booking Management System

For: Ali Akbar Nouri

- Designed and developed a complete personal website for a professional hairstylist and makeup artist, including a fully integrated online appointment booking experience.
- Developed a custom WordPress appointment and booking management system from the ground up, supporting both Jalali and Gregorian calendars.
- Built a multi-step booking flow allowing customers to select staff members, services, available dates, and time slots based on real-time scheduling rules.
- Created a comprehensive admin dashboard with booking statistics, today's appointments, recent activity, appointment filtering, and approve/reject workflows.
- Implemented full service and staff management, including configurable services, pricing, duration, individual working hours, holidays, and role-based staff access levels.
- Developed customer management features including customer search, birthday tracking, booking history, and CSV data export.
- Added manual/phone booking functionality for administrators to create reservations on behalf of customers.
- Implemented automated SMS and email notifications for booking updates, confirmations, and appointment-related events.
- Built configurable booking rules and slot management to control appointment availability, scheduling requirements, working hours, and holidays.
- Developed an iOS-style birth date picker for a smoother mobile booking experience.
- Added live booking toast notifications to provide real-time booking activity feedback and improve user engagement.
- Focused on responsive design, mobile usability, streamlined booking UX, and efficient day-to-day appointment management for both customers and administrators.
